

2nd Summer School “Nanotechnology in Agriculture”

Guido FELLETT - University of Udine

The Second Summer School “Nanotechnology in Agriculture” was organized and hosted by the department of Agricultural, Food, Environmental, and Animal Sciences of the University of Udine (Italy) from June 29th to 30th, 2023 and it was held under the patronage of CNR NANOTEC Institute of nanotechnology, the Società Italiana di Patologia Vegetale and the Società Italiana di Agronomia. The aim of the Summer School was to provide the participants with an overview of the potential applications of nanotechnology in the agri-food system but also to encourage and motivate them by favoring interactions and giving networking opportunities. The topics included the application of nanotechnology in plant nutrition and protection, nanomaterials design and characterization, as well as the environmental and human safety. At the end of the Summer School, participants were asked to fill in a feedback form about several aspects concerning the quality of the presentations, the infrastructure and facilities, and the hospitality and suggestions, as well. A brief description of the results from the feedback forms will be presented.
