

## **i-MATT - an infrastructure to boost innovation leveraging on advanced materials and digitalization**

Michele MUCCINI – *CNR-ISMN*

i-MATT Project is developed in response to the notice of the Italian Ministry for University and Research (MUR) for granting funding for the implementation or upgrading of technological innovation infrastructures (Nr. 3265/28-12-2021) under the PNRR national recovery plan.

i-MATT will offer advanced tools, solutions and services for the academic, business and market sectors to increase their competitiveness, and will provide new high-tech components, instruments and related services to remove technological and market barriers, promoting innovation and generating knowledge.

Here we will discuss the key features of the infrastructure, its strategic targets and expected operational modalities, given the present status of project implementation.
