

Ilaria ARDUINO – CV

Ilaria Arduino received a master's degree in Pharmacy at the Department of Pharmacy Pharmaceutical Sciences - University of Bari and the PhD degree in " Biomolecular Pharmaceutical and Medical Sciences ", at the University of Bari. From 2020 to 2022, she held a research grant for developing innovative micro- and nanoparticle-based therapeutic systems. Currently, she is a RTD A researcher in Pharmaceutical Technology and Regulations at the Department of Pharmacy Pharmaceutical Sciences - University of Bari. Her research activity is mainly focused on the design, implementation, and technological characterization of innovative pharmaceutical forms with regard to producing lipid-based nanoparticles by microfluidic technique.
