

Stefania BOI - CV

Bachelor's degree in Biomedical engineering, Master's degree in Neuroengineering and bio-ICT and a PhD in Bioengineering and Robotics, focusing on the development of bio-based drug delivery systems for medical therapies. Visitor researcher at the School of Engineering and Materials Science of the Queen Mary University of London, working on the development of a newly conceptualized biopolymeric drug delivery system. Post doc researcher at the National Research Council (CNR) IMEM, working on a project focused on implantable drug delivery systems. Currently R&D specialist in Nanomnia Srl, working on the biodegradable, microplastic-free encapsulation of molecules for the agrochemical, nutraceutical, and pharmaceutical fields.
