

Dario BRAMBILLA – CV

Dario Brambilla is a research technologist at the Institute of Chemical Sciences and Technology of the National Research Council of Italy (CNR-SCITEC). He obtained the master's degree in Pharmaceutical Chemistry in 2014 at Statale University in Milan. He completed his PhD in Pharmaceutical Sciences in 2021 at the same university.

He has been working at CNR since 2018, and his main focuses are the functionalization of biosensors with polymers and biomolecules. In particular, he worked extensively on the conjugation of antibodies with oligonucleotides to develop immunoaffinity probes for bioassays with improved performances. His efforts have been mainly applied to the separation and analysis of extracellular vesicles using digital detection platforms.
