

Gaia BRUSSA – CV

Gaia Brussa obtained a Master's degree in Environmental Engineering in 2022, following a path that took her through University of Bologna, Technische Universität Darmstadt and Politecnico di Milano, where she specialized in Remediation Technologies. Since then, she has been a research assistant at the AWARE research group of Polimi, mainly focusing on Life Cycle Assessment and waste management. She works on collection systems such as DRS (Deposit Return Scheme), waste sorting and recycling, with a specific focus on packaging waste but also on LCA applied to renewable energies.
