

## **Daniele CARULLO – CV**

Daniele Carullo excellently obtained a Ph.D. degree in Food Engineering in 2019 (University of Salerno) discussing a thesis entitled: "Integration of pulsed electric fields technology in the biorefinery of agri-food wastes and microalgae".

Since January 2022, he has been an Assistant Professor in Food Packaging at the Faculty of Food and Agricultural Sciences (University of Milan).

He mainly focuses on the production of eco-sustainable food packaging through the coating deposition of bio-derived nanomaterials onto conventional plastics.

He is author of 27 articles in ISI/Scopus Journals belonging to the Food Science/Engineering area and of more than 30 contributions at international conferences.
