

Luciano DE SIO - CV

Luciano De Sio is an assistant professor at the Sapienza University of Rome, leading the biophotonics lab. Luciano spent five years in the USA as a senior scientist at the BEAMCo. Luciano possesses extensive experience in photo-thermal therapy and reusable biosensors. He has co-authored 120 ISI-JCR publications in physics and biotechnology, several book chapters, 18 issued international patents, and delivered more than 50 scientific communications at conferences. Luciano has coordinated several projects of the European Office of Aerospace Research & Development; he is also the Project Director of a Multi-Year Project supported by the NATO Science for Peace and Security Programme.
