

## **Mariasole DI CARLI- CV**

Mariasole Di Carli graduated from the University of Rome "La Sapienza" in Chemistry and Pharmaceutical Technologies in the field of the synthesis of molecules for pharmaceutical applications, she obtained a PhD in Biotechnology from the University of Tuscia in Viterbo , is now an employee at the Energy Department of the ENEA Casaccia Research Centre.

She carries out activities in the sector of energy accumulation in electrochemical systems for the research and development of innovative electrode materials, electrolytics and polymeric membranes, in the context of European and national projects (Research of the Electric System, IPCEI, ORANGEES, IEMAP), with the aim of having more sustainable, performing and safer materials.

Author and co-author of technical reports, patents and international publications in the field of energy conversion applications.
