

Stefano FABRIS – CV

Stefano Fabris is research director of the National Research Council and has been the Director of the CNR-Istituto Officina dei Materiali since 2018. His research interests focus on computational materials science and theory of nanostructured materials, addressing in particular novel materials and interfaces for renewable energies. Since his PhD (2000), SF published more than 90 papers in international journals that so far received 34000+ citations, delivered more than 60 invited talks and directed/organised 14 scientific conferences and workshops.
