

**Marco FORTUNATO-CV**

Marco Fortunato received the Bachelor's degree in physics from the Sapienza University of Rome in 2011, and the Master's degree in physics of condensed matter from the Roma Tre University of Rome in 2015. In February 2019 Ph.D degree in Electrical, Materials and Nanotechnology Engineering from the Sapienza University of Rome. Since April 2020, he is a Fixed-term Assistant Professor of Electrical Engineering with the Department of Astronautical, Electrical, and Energy Engineering Sapienza University of Rome. His current research interests include fabrication and characterization of piezoelectric nanomaterial and nanocomposites for energy harvesting application, AFM and PFM characterizations, graphene based nanomaterials and piezoresistive pressure sensors, as well as strain sensors.
