

Walter GAGGIOLI - CV

Graduated in Electrical Engineering in 1997 after a PhD at the Department of Nuclear Engineering of the University of Rome La Sapienza, he worked at some energy consultancy companies. After these experiences, he started to work at ENEA as a researcher. In this context he cooperated at the development of innovative storage of thermal energy systems coupled to CSP plants. In ENEA, after having been responsible for the Solar Technologies Engineering laboratory, by 2021 is the responsible for the Solar Thermal, Thermodynamic and Smart Network Division at the Department of Energy Technologies and Renewable Sources.
