

## **Otmar GEISS - CV**

Otmar Geiss earned his Master of Science degree in Food Chemistry from the Technical University of Munich (TUM) in 1999. In 2001, he joined the Joint Research Centre of the European Commission and since then has been involved in method development and harmonization efforts in several domains, including indoor air quality research, emission testing from consumer products, analysis of micro- and nanoplastic particles in diverse matrices, investigations related to nanoparticles in general, and specifically their presence in food as well as in the field of Novel Foods.
