

Lucio LITTI - CV

Graduated in Chemical Sciences and PhD in Material Science and Engineering in 2015. He was visiting researcher at the Liz-Marzan's group (San Sebastian, Spain) and at the Hallanger's group (Trømsø, Norway). Nowadays he is a Tenure-Track Assistant Professor in Physical Chemistry at the Department of Chemical Sciences, University of Padova. His interests are about optical spectroscopies coupled with noble metal nanostructures and microelectronics. Relevant applications are about in-vitro cell cultures, tumor models, cultural heritage and quantitative sensing for biomedical and environmental targets.
