Paolo MASSOBRIO CV

Paolo Massobrio got the PhD in Bioengineering and Robotics from University of Genova (Italy) in 2008. He joined the Dep. of Informatics, Bioengineering, Robotics, and Systems Engineering at Univ. of Genova where he is associate professor of bioengineering. His research activities deal with the development of MEA-based brain-on-a-chip to investigate, with the support of computational models, the spontaneous and stimulus-evoked dynamics originating by the interaction of 2D and 3D heterogeneous neuronal populations.
