

Enrica MICOLANO-CV

Dr. Enrica Micolano graduated in Electrical Engineering at the University of Pavia in 2004. From 2004 she was employed in RSE dealing with research activities on advanced energy storage systems for vehicular and smart grid applications. She has acquired a wide experience in the testing of energy storage systems, dealing with different research topics, such as characterization tests of electrical energy storage systems of different technologies, grid integration and management issues. She is an Italian delegate for the IEC committee TC 120, working group 2 and 3.

From 2006 she is the responsible for the testing in the RSE battery laboratory.

From 2023 she is Project Leader of the Ricerca Di Sistema project “Flexibility of the integrated energy system”.
