

Ilaria OTTONELLI - CV

Ilaria Ottonelli obtained her PhD in Nanomedicine at the University of Modena in 2023. She is currently a post-doctoral research fellow at the Nanotech Lab in Modena: her research is focused on polymeric, hybrid, and lipidic nanoparticles, and nano-based scaffolds for the delivery of biologically active cargo to the retina, cancer, and neurodegenerative diseases, particularly focusing on novel formulative techniques such as microfluidics
