

Antonio Punzi

In the age of the digital revolution, the legal science is asking whether and to what extent it needs to rethink its traditional categories.

Indeed, the interaction between human and artificial intelligence will have an increasing impact on our cognitive and decision-making processes and our relationship with space and time. Special attention should be given to the most defining categories of modern law: the subject, the expression of his or her will, the modes of acquisition of property, and the systems of circulation of goods. The technohumanism of tomorrow needs new modes of regulation that can ensure the security of people, their data and property. In short: of everyone's dignity and values
