

Gabriele SALEH - CV

Gabriele Saleh * obtained his PhD in Chemical Sciences from the University of Milan in 2014 following his studies on crystallography and chemical bonding. Afterwards, his research activity revolved around computational materials science and spanned a wide variety of subjects such as planetary chemistry, corrosion, and, lately, nanoscience. He has also gathered a diverse experience by working in several research institutes across Europe and Russia (University of Milan, University of Aarhus, Moscow Institute of Physics and Technology, Trinity College Dublin, Italian Institute of Technology) and by carrying out projects in collaboration with industrial laboratories such as Nokia Bell Labs and Siemens. He has authored scientific papers in prestigious journals such as Nature Chemistry, Advanced Materials, and Angewandte Chemie.
