

Antunes STAFFOLANI - CV

Dr. Antunes Staffolani is a Junior Researcher (RTDa) at the department of Chemistry “G. Clamician” and at the CIRI-FRAME (industrial research center for renewable sources, environment, sea, and energy) of the University of Bologna (supervisor Prof. Francesca Soavi). His research is carried out at the Enercube lab (technology transfer laboratory of electrochemical systems). His work is focused on development of Li-ion and post-Li batteries, as well as recycling and design for recycling of Li-ion batteries. He is author and co-author of 10 research papers (h-index = 6) and 1 patent application.
