

Filippo STRINGA - CV

Energy engineer graduated at Politecnico di Milano.

I coordinate the realization of Erion's Sustainability Report, and the development of strategic projects for the Consortium of the Erion System. I manage and support the research activities of ongoing H2020 projects, Horizon Europe projects, EIT Climate KIC projects and EIT Raw Materials projects, cooperating with international partners on different research topics such as WEEE recycling and reuse, recycling and reuse of lithium batteries, CRM recycling, education, circular business models and circular economy.

Development and writing of new project proposals.
