

## **Luca TUBIANA – CV**

Luca Tubiana obtained his PhD in Physics and Chemistry of Biological Systems from SISSA, Trieste, in 2012. His main research interest is the computational investigation of the interplay between topological, physical, and biological properties of polymeric systems. Since 2019 he has been part of the scientific committee of "Industrial Problem Solving with Physics", a challenge-based learning initiative of the University of Trento. He has been the chair of the European Topology Interdisciplinary COST Action (CA17139) between November 2019 and May 2023. Since September 2022, he has been an associate professor of applied Physics at the University of Trento.
