

## **Alessandra ZANOLETTI - CV**

Alessandra Zanoletti is an Environmental Engineer with a PhD in Mechanical and Industrial Engineering. Her research interests are focused on the recovery and valorisation of industrial wastes. During her PhD she worked on the synthesis and characterization of innovative and sustainable porous materials for particulate matter capture. From 2019 she is a research fellow at Chemistry for Technology laboratory at University of Brescia. She works on the recovery of strategic metals from exhausted lithium-ion batteries and on sustainability analysis of processes to recycle them.
