

## **Lorenzo ZULLO-CV**

Biography - Lorenzo Zullo holds an MSc in Environmental Engineering from the Politecnico di Milano (Milan, Italy), along with an MSc in Chemical Engineering and an MA in Sustainable Infrastructures from the Royal Institute of Technology (Stockholm, Sweden). After dedicating nearly a decade to working in Brussels for various industry associations, where he coordinated and managed initiatives related to chemicals and health & safety within the industry, Lorenzo embarked on entrepreneurial endeavors.

In 2011, Lorenzo funded and is still managing Chemycal.com, a pioneering web-based tool to monitor chemical regulatory systems on a global scale. Furthermore, Lorenzo is a co-founder of ChemChain, a visionary blockchain platform aimed at revolutionizing the storage, exchange, and tracking of chemicals information throughout the value chain and during the entire product lifecycle.
